1948

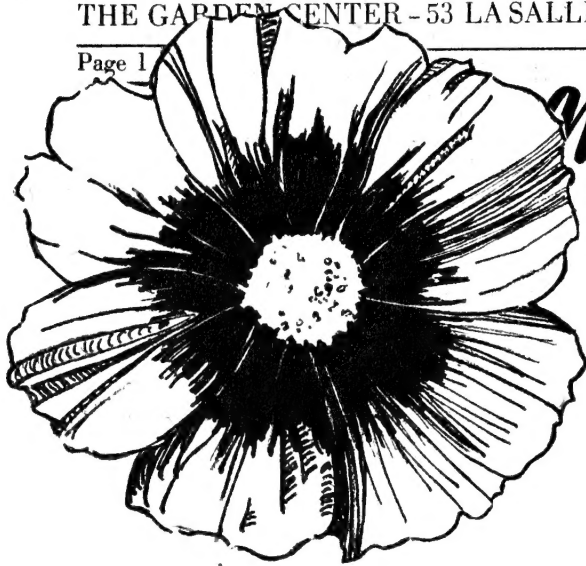

THE **GARDEN CENTER** INC.

WEST HARTFORD (7)

CONNECTICUT

New Flowers

COSMOS RADIANCE Silver Medal winner for 1948. Huge flowers of deep rose with a striking crimson zoned center. Wonderful and long lasting as a cut flower. **Pkt. 25¢**

MARIGOLD RED HEAD Beautiful little plants 1 ft. high and 1½ ft. across, covered with single 2" mahogany red flowers with golden crested centers. **Pkt. 25¢**

SWEET PEAS CUTHBERTSON This heat resistant strain introduced in 1947 has proved an ideal grower for our difficult New England season. All colors mixed. **Pkt. 20¢**

TETRA SNAPDRAGON A vigorous new race of snapdragon developed with the aid of colchicine. Monster flower spikes in the wonderfully extensive range of snapdragon colors on giant plants 2½ ft. tall. **pkt. 25¢**

SNAPDRAGON VELVET GIANT A monster Tetra snapdragon of deep velvety crimson with an undertone of orange bronze. **pkt 25¢**

PHLOX TETRA RED Try the new tetraploid annual phlox! 20" tall, this larger flowered phlox has heavy trusses of deep red florets. Grand as a cut flower or in the annual border. **pkt 25¢**

ZINNIA LUTHER BURBANK Huge 5½" flowers in exquisite pastel shades of cream, buff, canary, ivory, salmon, apricot, apple blossom and coral. The vigorous plants grow 3 to 4 ft. tall and are well branched. **Pkt. 25¢**

Newer Vegetables

BUSH LIMA BEAN FORDHOOK SPECIAL This strain (U.S.D.A. 242) is almost sure to replace the older variety. A vigorous grower, it has the same high quality of Fordhook but will out-yield it, especially under adverse drought conditions.

pkt 15¢, ½ lb. 35¢, 1 lb. 65¢

BEANS PUREGOLD A fine new wax snap bean (Bronze Medal 1948). Round 6" pods, very straight and a bright crisp yellow. Mosaic resistant. **Pkt. 15¢, pound 65¢**

PEAS FREEZONIAN 63 days. 3 ft. vines, wilt resistant. Dark green peas of superb flavor, highly recommended for freezing. **Pkt. 15¢, pound 60¢**

CARROT TOUCHON 70 days. Slender bright orange and almost no core. Superb flavor, and the most tender carrot to date. **Pkt. 10¢**

TOMATO BURPEE HYBRID 70 days. An early mid-season hybrid, outstanding for the quality and rich flavor of its fruits which are medium to large, firm, and thick walled. They average 8 oz. in weight, are a bright scarlet red. The flesh is meaty and so rich in flavor that most other varieties seem flat in comparison. **30 seeds, 35¢**

CUCUMBER BURPEE'S HYBRID A true hybrid with true hybrid vigor. Prolific, disease-resistant; a crisp and delicious cucumber. **30 seeds, 25¢**

PURPLE CAULIFLOWER It really is purple but cooks to a light green. Superior flavor. Try it! **Pkt. 25¢**

BUSH BEANS 1 pkt plants 15', 1 lb. — 100'. Plant 2 inches deep, rows 2½' apart. For succession, plant every 2 weeks from May thru July.

GREEN BUSH VARIETIES

BOUNTIFUL 49 days, flat meaty pod, long season.
BLACK VALENTINE 52 days, straight oval, delicate flavor.

LONGREEN 48 days, a delicious round bean 6" long.
STREAM-LINER, 51 days, brittle flat 7" pods.
STRINGLESS GREEN POD 50 days, round slim pods, succulent.
TENDERGREEN, 53 days, a round brittle bean of superior quality.

pkt 10¢, ½ lb. 30¢, 1 lb. 50¢

YELLOW OR WAX BUSH VARIETIES

IMPROVED GOLDEN 48 days, flat and rust resistant.
PENCIL POD 54 days, meaty and of superb quality.

ROUND POD KIDNEY 53 days, long waxy white, rust free.
SURECROP 53 days, the "Golden Bountiful", prolific.

pkt 10¢, ½ lb. 30¢, 1 lb. 55¢

SOY BEANS, BANSEI 96 days, delicious green or dry, productive and vigorous.

FAVA BEANS 75 days, the English Broad Bean, flavor somewhat pea like; plant early, thin plants to 4" apart and space rows 3'.

pkt 15¢, ½ lb. 30¢, 1 lb. 50¢

SHELL BEANS

DWARF FRENCH HORTICULTURAL 73 days, green pod, carmine streaked.
RED KIDNEY, 95 days, richly flavored pinkish red.

BAKING BEANS

WHITE MARROW 100 days.

U. S. Department of Agriculture

Connecticut Sealed Grass Seed for Finest Lawns

We carry Connecticut Sealed grass mixtures exclusively. They are approved by the Connecticut State Department of Agriculture for varieties of grasses, purity, and germination. Our mixtures exceed the standards by containing a larger percentage and a greater variety of high priced, fine leaved grasses.

For quick vigorous growth (new seeding) sow 1 lb. of grass seed to 200 square feet. For reseeding old lawns, 1 lb. to 400 sq. ft.

GOLD SEAL	—	for a superb velvety turf. Highest quality seed.				
			1 lb. \$1.00	5 lb. \$4.50	25 lb. \$21.00	100 lb. \$80.00
BLUE SEAL	—	best for general use — a dark green permanent lawn.				
			1 lb. \$.80	5 lb. \$3.75	25 lb. \$17.00	100 lb. \$65.00
RED SEAL	—	a quick growing, moderately priced grass.				
			1 lb. \$.70	5 lb. \$3.25	25 lb. \$14.50	100 lb. \$55.00

for Shady Places —

GOLD SEAL SHADY Comparable in quality to the regular Gold Seal, this seed makes an exceptionally fine leaved lawn and will grow in moderate shade.

1 lb. \$1.10 5 lb. \$5.00 25 lb. \$22.00 100 lb. \$85.00

BLUE SEAL SHADY

This grass is shade tolerant and will grow equally well on dry but sunny lawns —a tough grass.

1 lb. \$.85 5 lb. \$4.00 25 lb. \$18.00 100 lb. \$70.00

We carry the following selected grasses that are used in our lawn mixtures and we can offer them separately at the prevailing market price:

ASTORIA BENT (*Agrostis canina tenuis*) The grass used in putting greens and the most practical bent grass to use in lawn mixtures. It makes a firm, durable turf.

CHEWINGS FESCUE (*Festuca rubra var. fallax*) Its needle-thin, dark green leaves make a handsome lawn. It will tolerate shade and thrive on dry soils, and is best used in mixture with other grasses.

KENTUCKY BLUEGRASS (*Poa pratensis*) Best of the truly permanent lawn grasses, it is fine textured and deep emerald green. Rather slow to become established, it is the basic seed for lasting lawns.

RED TOP (*Agrostis alba vulgaris*) A fine grass, relatively short lived (under lawn conditions), excellent as a nurse crop mixed with the slower developing perennial grasses.

RYE GRASS DOMESTIC (*Lolium italicum*) Good for a quick cover crop. Excellent to hold banks while the hardy grasses become established.

WHITE DUTCH CLOVER (*Trifolium repens*) Low growing and creeping, clover stays a good green throughout the season.

WILD WHITE CLOVER (*Trifolium Repens Var.*) This clover may eventually supersede White Dutch. It is more persistent and will stand extremely close cropping. It blossoms less than ordinary white clover. A grand aid in combatting crabgrass. One quarter pound is sufficient to mix with 5 lbs. grass seed.
